DEPARTMENT OF COMPUTER SCIENCE
RAJAGIRI COLLEGE OF SOCIAL SCIENCES
(Autonomous)

MASTER OF COMPUTER APPLICATIONS

2025 – 2027

MCA 202

JAVA PROGRAMMING
LAB RECORD

NAME : ASHBI SAJU

SEMESTER : SECOND

REGISTER NO. : 25204016

DEPARTMENT OF COMPUTER SCIENCE
RAJAGIRI COLLEGE OF SOCIAL SCIENCES
(Autonomous)
KALAMASSERY - KOCHI – 683104

CERTIFICATE

NAME : ASHBI SAJU

SEMESTER : SECOND

REGISTER NO. : 25204016

*Certified that this is a bonafide record of work done by **Ashbi Saju** in the Software Laboratory of MCA202 subject in the second semester Master of Computer Applications examinataions 2026, Department of Computer Science, Rajagiri College of Social Sciences (Autonomous), Kalamassery.*

Ms. Neethu Narayanan
Faculty in Charge

Dr. Bindiya M Varghese
Dean, Computer Science

Internal Examiner

External Examiner

Place : Kalamassery
Date :

TABLE OF CONTENTS

Si.No	ACTIVITY	PAGE No.
1	Write a program to implement command line arguments.	1
2	Write a program to implement switch case using command line arguments.	2
3	Write a program to keep a secret number between 20 and 30 and ask the user to predict it using a do-while loop until the correct number is guessed and display the number of attempts.	5
4	Write a program to perform searching and sorting operations on elements in an array.	7
5	Write a program to demonstrate passing an array in different ways in Java.	11
6	Write a program to add and multiply two matrices in Java.	13
7	Write a program using a function that returns the maximum of two integers and use it to find the maximum of three numbers.	17
8	Write a program to reverse a number using a function and check whether the number is a palindrome.	19
9	Write a program to implement the 15-puzzle (sliding puzzle) problem.	22
10	Write a program to display numbers from n to 1 and 1 to n using recursive functions.	25
11	Write a program to perform addition, subtraction, multiplication and division of two numbers using object-oriented concepts.	27
12	Write a program to create a class Complex with data members real and imaginary and provide functions to read, display, add and multiply complex numbers.	31
13	Write a program to create a CString class with functions to read, display, compare, add and concatenate strings.	34
14	Write a program to create a Student class with sno, sname and sprogram and compare two student objects for equality.	37
15	Write a program to demonstrate IS-A and HAS-A relationships in Java.	40
16	Write a program to demonstrate function overriding in Java.	43

17	Write a program to demonstrate the use of the super keyword to overcome function overriding and pass arguments to the base class constructor.	44
18	Write a program to create an Employee class with eno, ename and esal and perform reading, displaying and searching operations.	46
19	Write a program to implement run-time polymorphism in Java using an interface.	49
20	Write a program to create an interface ishape with methods draw and move and implement it using circle and rectangle classes.	50
21	Write a program to demonstrate multiple catch statements using predefined exceptions.	52
22	Write a program to implement a user-defined exception in Java.	54
23	Write a program to demonstrate re-throwing of exceptions and the use of the finally block.	56
24	Write a program to create a user-defined exception class for validating a password based on given conditions: • The password must be at least 8 characters long. • It must contain at least one lowercase letter. • It must contain at least one uppercase letter. • It must contain at least one digit. • It must contain at least one special character from the set # , * , ! , { , } , (,) , [,] , = • The password must not contain consecutive repeating characters. • If any condition fails, throw a user-defined exception with an appropriate message; otherwise, display that the password is valid.	58
25	Write a program to implement multithreading by inheriting the Thread class.	61
26	Write a program to create threads using the Runnable interface.	63
27	Write a program to create two threads to display odd and even numbers up to N.	65
28	Write a program to search for a given element using n/5 threads.	67
29	Write a program to compute the square and cube of a given number using two separate threads.	70
30	Write a program to simulate a printer queue using multiple threads without synchronization.	72
31	Write a program to simulate a printer queue using multithreading with synchronization.	74

32	Write a program to demonstrate inter-thread communication using wait(), notify() and notifyAll().	76
33	Write a program to simulate bank deposit and withdrawal using threads without synchronization.	81
34	Write a program to demonstrate thread priority in Java.	84
35	Write a program to simulate ATM operations with multiple users accessing the same account using synchronized methods.	86
36	Write a program to implement a generic method in Java.	90
37	Write a program to implement a generic class in Java.	93
38	Write a program to create a menu driven program for performing the following operations. • Length of a given string • Compare for equality • Extract a substring from a string. • Convert to uppercase and lowercase • Reverse a string	97
39	Write a program to demonstrate the use of the StringBuffer class.	103
40	Write a program to implement server-client communication in Java.	108
41	Write a program to implement one-to-one chatting between client and server.	112
42	Write a program to download content from the server to the client.	117
43	Write a program to upload content from the client to the server.	121
44	Write a program to implement public chatting using sockets.	125
45	Write a program to implement connectionless communication using DatagramSocket.	131
46	Write a program to get the protocol, file name, host, path and port of a given URL.	135
47	Write a program to download a file from a given URL.	137
48	Write a program to display the content of a webpage.	140

49	Write a program to insert values into a database table using Java.	144
50	Write a program to check whether a record exists in a login table containing username and password.	147
51	Department is table having dno, dname, dloc. Emp is table having eno, ename, esal and dno. Write a program for displaying the information in the following order: **eno ename esal dname dloc** 1 abc 10,000 MCA MB 2 bcd 20,000 MSW OB	149
52	Write a program to demonstrate the use of CallableStatement and PreparedStatement.	151
53	Write a program to demonstrate transaction and batch processing in Java database connectivity.	158
54	Write a program to implement serialization and deserialization in Java.	165
55	Write a program to demonstrate IS-A relationship in serialization and deserialization.	168
56	Write a program to demonstrate HAS-A relationship in serialization and deserialization.	172
57	Write a program to deserialize selected attributes of an object using the transient keyword.	176
58	Write a program using AWT to find the maximum of three numbers.	179
59	Write a program to demonstrate all functionalities of the LIST control in AWT.	183
60	Write a program to implement checkbox and radio button using AWT.	191
61	Write a program to implement menus using AWT.	199
62	**PROJECT** E-Commerce Management & Shopping System	211
